-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Remark

1. This is a first action following the filing of an RCE on 12/6/04

Election/Restrictions

2. Claims 31-90 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Applicant timely traversed the restriction (election) requirement in the reply filed on 9/28/05.

3. Applicant's election with traverse of claims 1-10 in the reply filed on 11/2/05 is acknowledged. The traversal is on the ground(s) that "MPEP section 811 provides that before making a restriction requirement after the first action on the merits, the examiner will consider whether there will be a serious burden if restriction is not required", applicants remarks dated 11-2-05. The applicant further asserts that there is no serious burden put upon the examiner in considering each of withdrawn claims 31-90. Applicant is referred to MPEP 808. Reasons for insisting upon restriction. Two aspects must be considered, (1) why the inventions are independent/distinct and (2) reasons for insisting upon restriction. The examiner has done both.

The requirement is still deemed proper and is therefore made FINAL.

Claim Objections

4. Claim 1 is objected to because of the following informalities:

Art Unit: 3663

In claim 1, the limitation “adjusting a ring flame temperature at said first burner dome in said gas turbine engine to determine a.....boundary for said first burner dome” has been repeated in paragraph 5 of claim 1.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-30 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the preamble recites, “mapping a combustor in a gas turbine engine”, but the body of the claim does not teach or suggest “mapping a combustor in a gas turbine engine”.

Further in claim 1, the limitations “said plurality of sensors”, “said temperature window size” each lack antecedent basis.

Further in claim 1, “a *minimum* ring flame temperature boundary” is indefinite. It is not clear what all is meant and encompassed by the term “minimum”.

Further in claim 1, “a nominal ring flame temperature” is indefinite. It is not clear what all is meant and encompassed by the term “nominal”.

Communication
